

AUTOMATION CONTROL, DISPLAY AND COMMUNICATION

GEFRAN

PERFORMANCE

GCube MACHINE AUTOMATION CONTROLLERS

Integrated automation solutions capable of offering a global response to specific needs. Scalable proposals, single programming environment and a high level of integration of the whole Gefran production range for a tailor-made offer.

Fit Custom Controller

Compact Compact Controller

TEXTILES

FOOD

GLASS

PAPER

Advanced Distributed Controller

Performa Embedded Controller

Modula Integrated Controller

- > **STANDARD IEC 61131-3** programming language
- > **SCALABLE** architectures
- > **REUSABLE** applications
- > **SINGLE SOFTWARE** for all automation
- > **INTEGRATED ETHERNET** connection
- > **INTEGRATED** programming environment
- > **HMI + PROGRAMMING LOGIC**

FUNCTIONALITY

MARKETS

WOOD

WATER TREATMENT

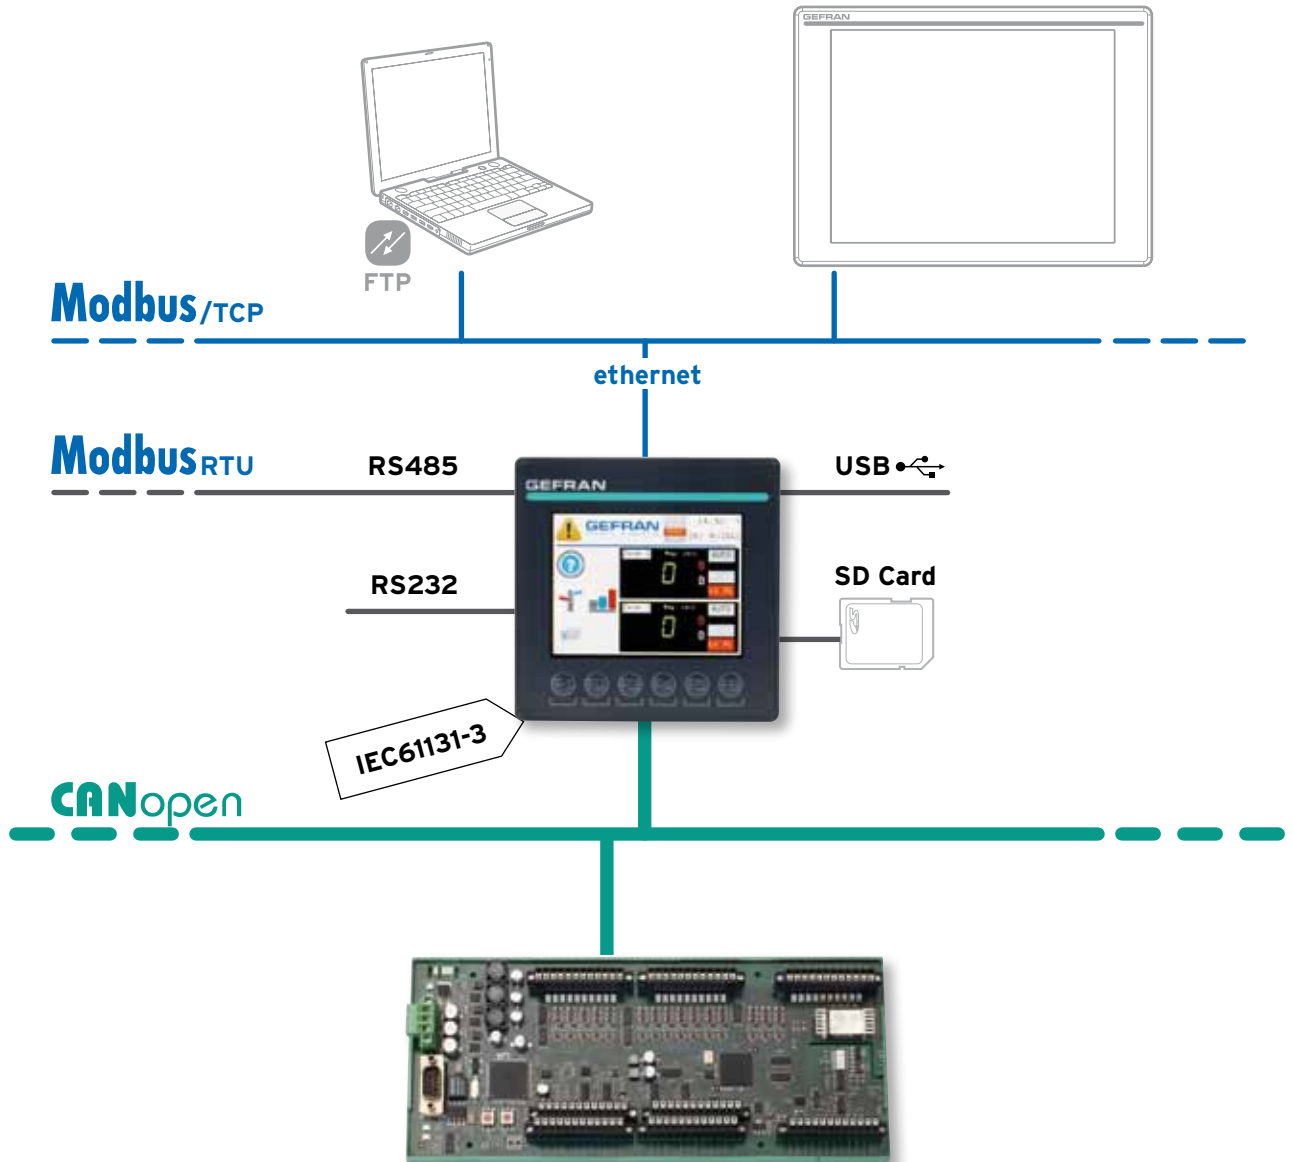

PLASTICS

WINE-MAKING

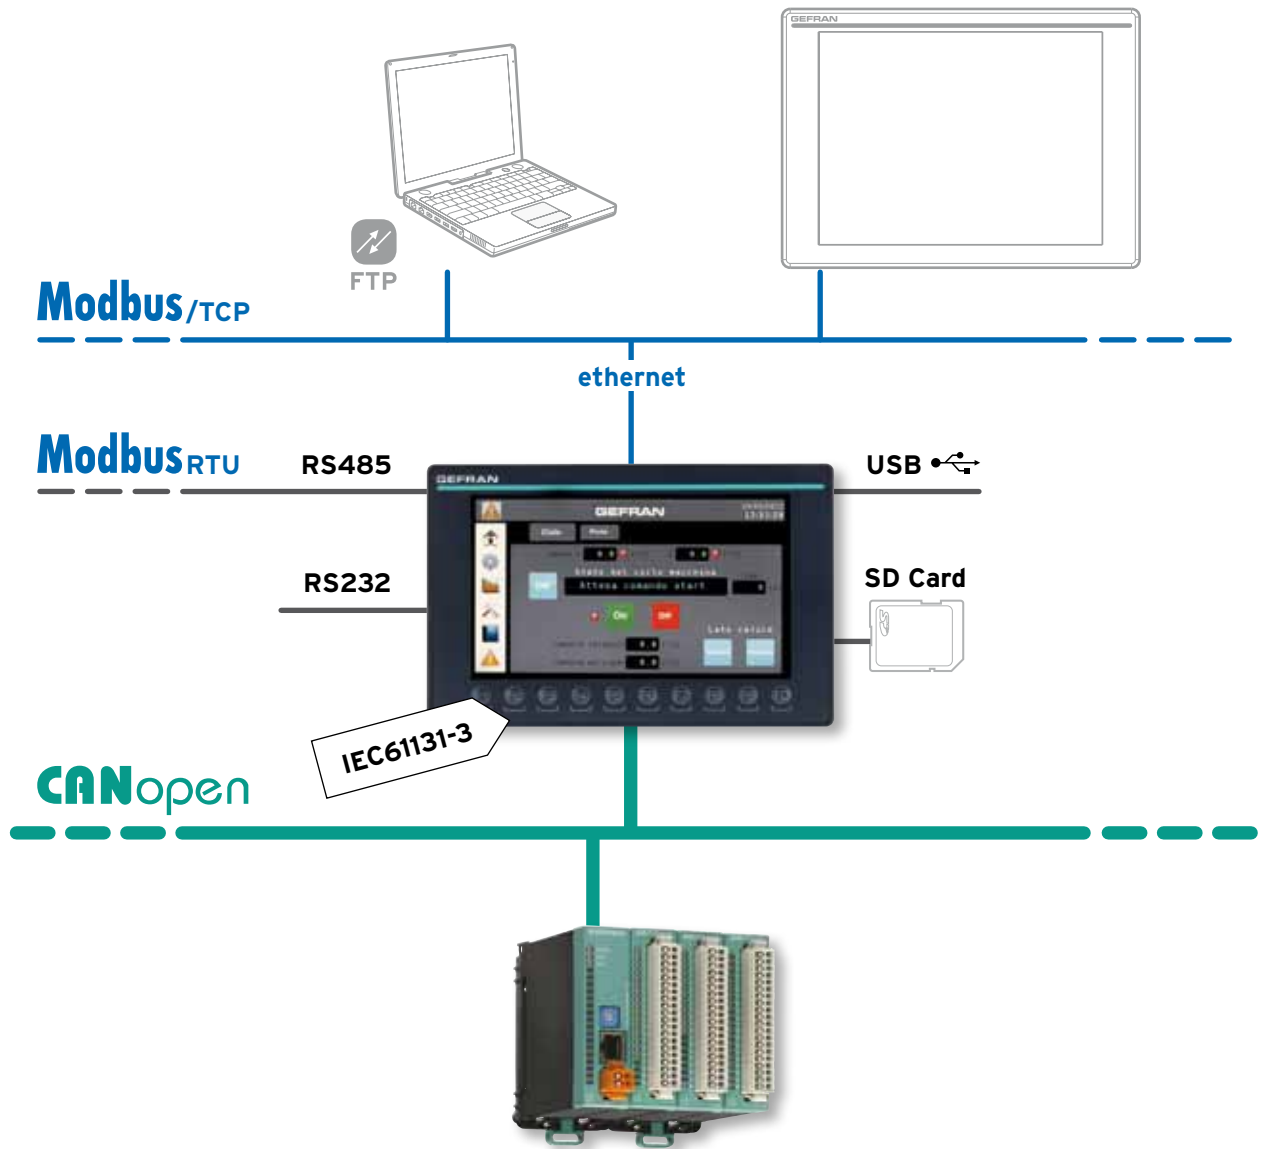

Particularly suitable for price-sensitive applications, thanks to its flexibility this solution is used on different markets, such as: autoclaves, temperature controls, metal washers, plastic dryers, etc.

Solution consisting of two elements, an integrated control (PLC and HMI) and a remote I/O board with a high level of customisation.

- > CUSTOM SOLUTION
- > PROCESS FUNCTIONS
- > DATA FILING

Powered by

This very compact modular solution enables the satisfaction of different medium-small automation solutions.

Solution consisting of two elements, an integrated control (PLC and HMI) and remote I/O modules.

- > MODULAR SOLUTION
- > OPEN ARCHITECTURE
- > DEDICATED FUNCTIONS LIBRARY

Powered by

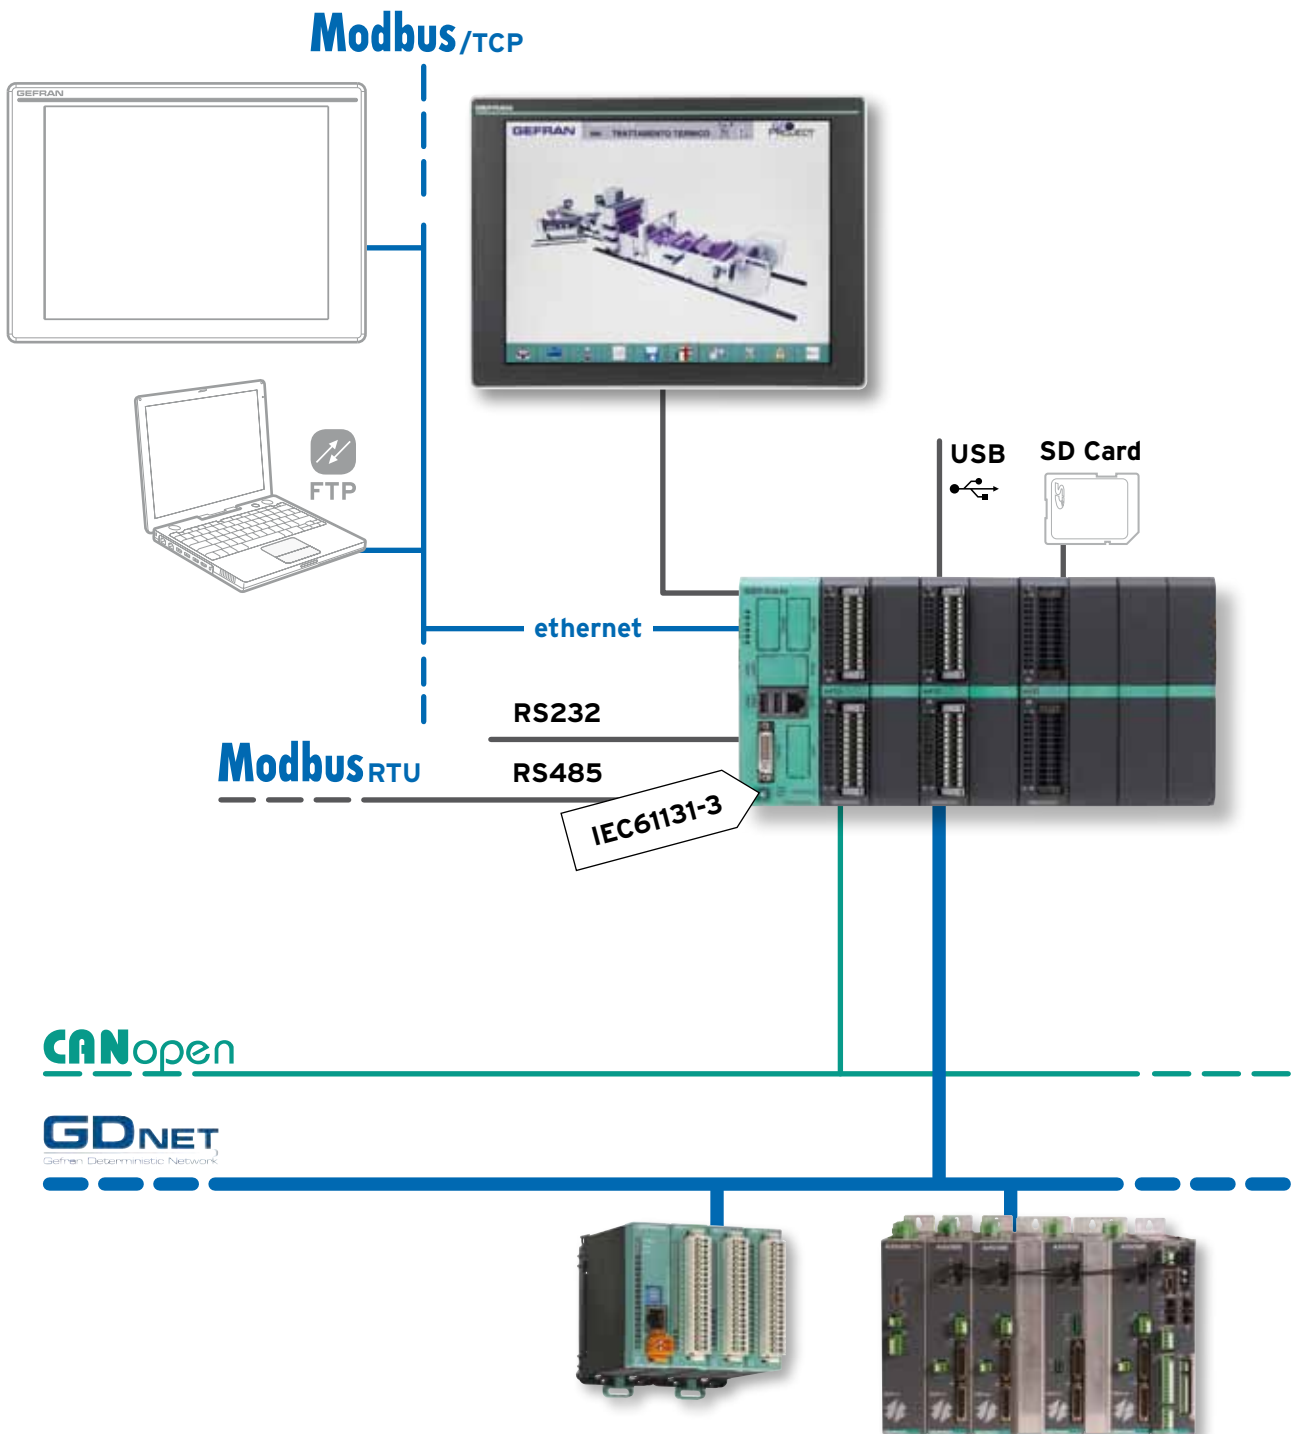

Enables the construction of high-performance, multiprotocol applications that are easily integrated into company networks.

Solution based on integrated control (PLC and HMI) and remote I/O modules connected via a real-time Ethernet fieldbus.

- > ETHERNET REAL-TIME
- > SCALABLE
- > MULTI PROTOCOL

Powered by

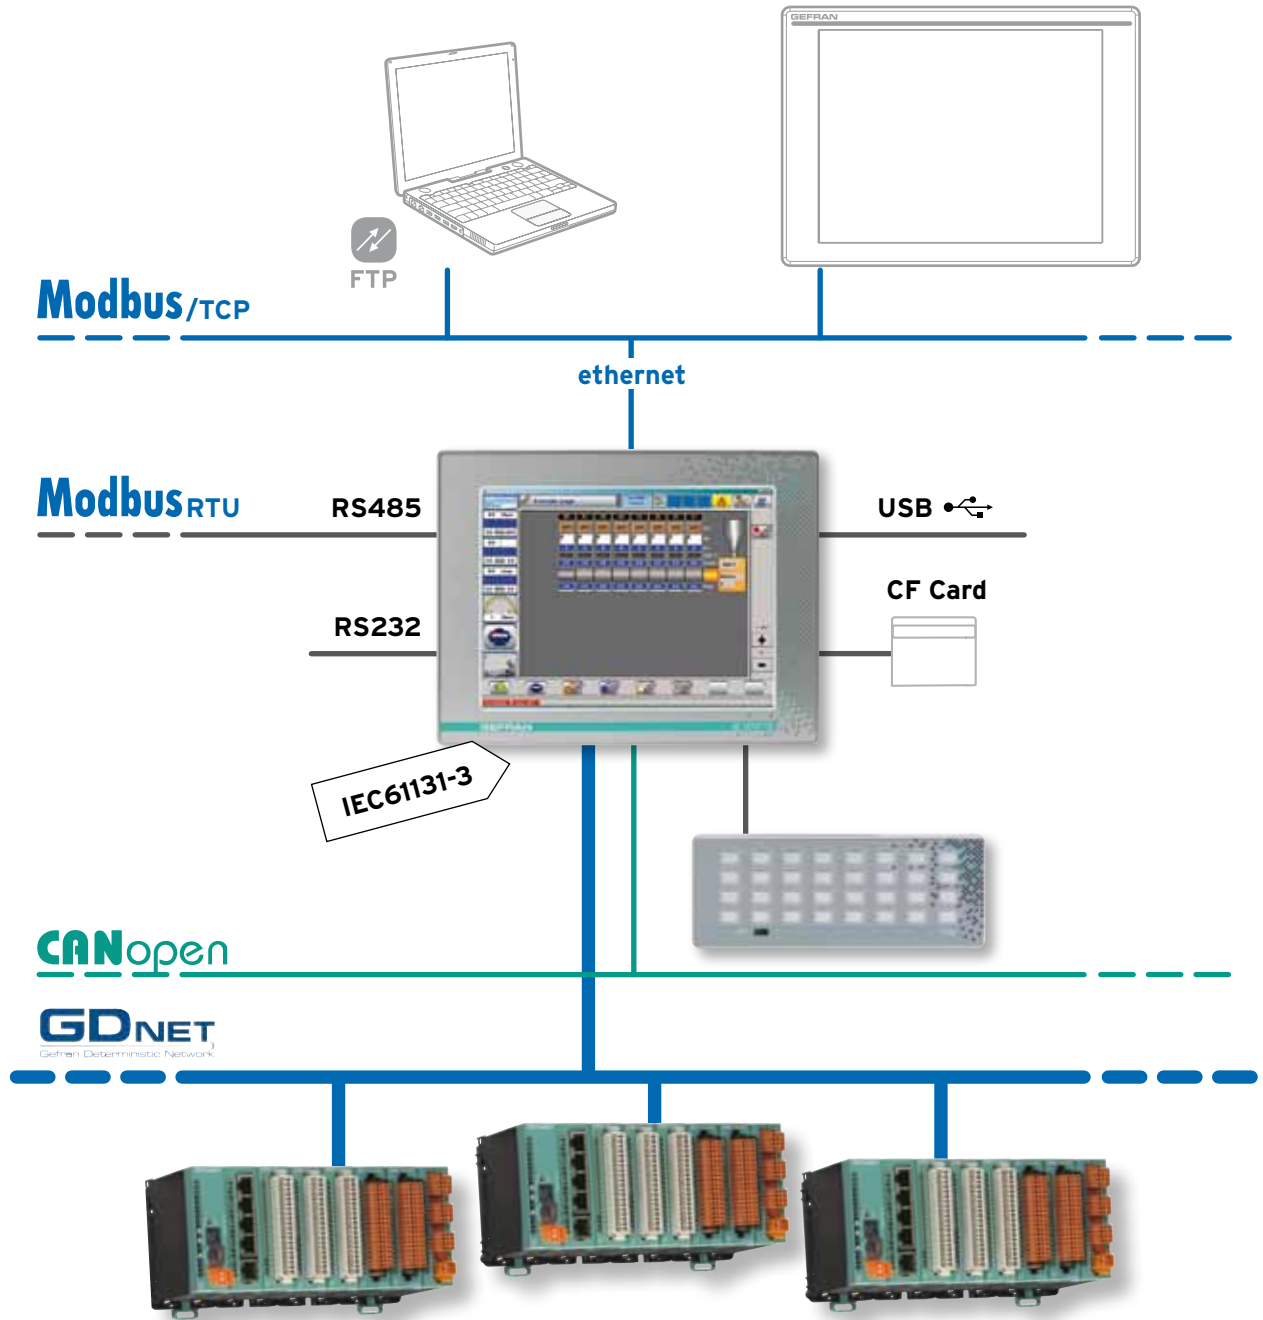

Is a cost-effective industrial solution for medium-high level automation applications

The complete and integrated solution for control, monitoring, communication and management of machine automation.

- > CONFIGURED AND TESTED FOR THE REQUIRED NUMBER OF I/Os
- > LOCALLY EXPANDABLE, REMOTELY EXTENDABLE
- > SCALABLE SOLUTION

Powered by

High-performance distributed solution based on integrated control [PLC and HMI] and remote I/O modules via a real-time Ethernet fieldbus.

Through extremely advanced diagnostics it is possible to monitor every single aspect of automation.

- > DISTRIBUTED SOLUTIONS
- > HIGH PERFORMANCE
- > ADVANCED DIAGNOSTICS

Powered by

Gefran Automation DNA

GF_Project VX & GF_Project LX are composed of integrated software modules with specific functions that provide easy and intuitive configuration of different type of automation projects.

-  » Operator interface
-  » Machine control sequence (PLC)
-  » HW + communication architecture
-  » Project manager
-  » Code Library
-  » Connectivity
-  » Diagnostic

 » Operator interface

 » Machine control sequence (PLC)

 » HW + communication architecture

Configuration of the man/machine graphic pages interface with advanced graphics

Configuration of the part of machine control for Real Time solutions

Configuration of the single devices used and the type of communication adopted

GF_Project is the integrated development environment (IDE) for developing control applications in real time.

- **SHARED STRUCTURE FOR HMI AND PLC CONFIGURATION**
- **STANDARD LANGUAGE: (IEC 61131-3)**
- **POWER AND SIMPLICITY IN DESIGN AND CONFIGURATION**

» Project manager

A common configuration style with a clear graphic visualisation for all the project modules help and make easy their configurations. The following main modules are available :

- Alarm management
- Multilanguage management (UNICODE)
- Recipe management
- User management

» Code Library

In the module library are a structured set of libraries FB that facilitate and reduce the development time of an automation project .

» Connectivity

The connectivity module includes a set of tools to meet the growing demand for remote access to machines and plants.

» Diagnostic

The diagnostic module provides a complete set of easy to use and efficient tool for all phases of testing and verification of the system

GF_VEDO

Outstanding Control and Graphic capabilities in a single product.
 Display size from 3.5" to 15".
 Extensive data logging and recipe handling.

- TOUCH-SCREEN
- INTEGRATED ETHERNET INTERFACE
- INTEGRATED RUN-TIME PLC
- VERTICAL / HORIZONTAL INSTALLATION

GILOGIK II

High performance remote modular I/O.

Compact design with high IO density per module for installation in small spaces.

High performance Fast-ethernet GDnet or CANopen protocol with easy integration of third-party products

- > **SPACE SAVING DESIGN**
- > **PARALLEL BACKPLANE**
- > **FAST-ETHERNET GDNET / CANOPEN PROTOCOL**
- > **MODULAR SOLUTION**

Different backplanes are available [2, 4, 8, 12 and 18 slot] for the installation of digital, analogue and functional modules. The type of fast-ethernet GDNet or CANopen communication protocol is achieved via fieldbus modules installed in the first position on the backplane.

Back-plane 2 slot

Back-plane 4 slot

eGT-I, ePanel

The interface panels, equipped with a high-contrast color display with very wide viewing angle, let you display and change automation data on a touch screen (always present). Installable on the panel, on the rack, or on the control console, in combination with the ePCLoGic400 series PLC, they are an efficient and reliable solution for a wide range of machines. Integrated keyboard solutions are available, designed specifically for plastic processing machinery.

ePLogic400

ePLogic400 is the complete solution for process and automation control: a single, modular system (preconfigured and expandable) that controls sequences and manages work processes. The ePanel and eGT-I operator interfaces are available separately, in combination with the in-rack ePLogic400 PLC, which integrates CPU and I/O modules. The PLC can be completely customized with respect to CPU power and to the number and type of inputs and outputs, adapting perfectly to the machine or system to be controlled.

- > FANLESS AND DISKLESS SOLUTION
