## FIBRE OPTIC SENSOR FOR DIN RAIL MOUNTING

- 10 bit resolution models with 500 µs response for high operating distances
- 12 bit resolution models with 50 µs response and 4 digit display for high speed
- Cost-effective models with multiturn trimmer adjustment
- EASYtouch™ push-button setting with remote control, keylock and output delay
- Ultra-thin housing with CLEARLOCK™ patented fibre fixing system

# S7 SERIES

## the 1st in Europe

The **\$7** series is the first fibre optic amplifier to be manufactured in Europe that is equipped with a full 4 digit display, confirming Datasensor's technological leadership. With its slim 10mm body width, the **\$7** represents the ideal solution for all applications requiring high accuracy sensing combined with very compact dimensions.

The high resolution 12 bit amplifier has a response time of 50 µs for a switching frequency of 10 Khz; 4096 resolution steps make the **S7** series perfect for ultra high precision detection of small objects and low colour contrasts.

This is made easier by the integral 4 digit display, which clearly indicates the received signal, selected time delay and the adjustable set point values. Moreover, the white light LED emission possibility enhances the contrast detection.

Installing and setting the **S7** is easy and rapid, thanks to the patent-covered  $CLEARLOCK^{TM}$  fibre fixing and  $EASYtouch^{TM}$  adjustment system that offers remote setting, keylock and activation of the output OFF delay function.

Furthermore new versions of the **\$7** series are available with multiturn mechanical trimmer threshold adjustment for cost-oriented applications.

**S7** 

The ultra-thin housing is specifically designed for side-by-side mounting on DIN rail where space is limited or mounting through two M3 clearance holes onto the side of a machine. The CLEARLOCK™ fibre-optic fixing system assists reliable insertion of standard and high performance fibre-optics. 2.2mm Ø EASYtouch™ one touch setting procedure automatically selects the best detection conditions. For critical applications a two touch setting is provided for fine tuning. S7 benefits from remote teach, keypad lock and delay off timing functions. For further information on our extensive range accessories please see our OF and OFA fibre optic datasheet.

### **ACCESSORIES**

 $CLEARLOCK^{TM}$ 

For **dedicated accessories** refer to the **ACCESSORIES** section of this catalogue

Refer also to **Fibre-Optics**, **Connectors** and **Fixing brackets** of the **General Catalogue** 

#### **DIMENSIONS**

### **INDICATORS AND SETTINGS**

Teach-in button for setting.

EASYtouch™ provides two setting modes: standard or fine.

Please refer to instructions manual for operating details

- A OUTPUT status and READY/ERROR LEDs
- B Teach-in push-button
- c M8 connector output
- D Cable output
- E 4 digit display
- STATUS signalling
- G OUTPUT status LED
- H '+' e '-' buttons
- I Fibre lock/unlock button
- J Multiturn trimmer

## **CONNECTIONS**

## 25/50/75/100/300 mm

## **TECHNICAL NOTES**

- <sup>1</sup> Limit values
- $^2$  Average life of 100.000 h with  $T_A$  = +25  $^{\circ} \mathrm{C}$
- <sup>3</sup> Connect to 0 V when remote wire not used
- <sup>4</sup> Active with remote at +V at power on
- <sup>5</sup> PVC, 4 x 0.14 mm<sup>2</sup>
- <sup>6</sup> A reverse polarity protection
  - B overload and short circuit protection

### **DETECTION DIAGRAMS**

Standard fibre-optics:

OF-42-ST-20 proximity / OF-43-ST-20 through beam

High efficiency fibre-optics or accessory lenses can be used to obtain larger operating distances. Refer to **Fibre-optics** (A.02) of the **General Catalogue** 

**Note:** the detection diagrams of the S7-1/4 models in normal and fast mode, corresponds to the values of the S7-2/5 models in fast mode, but with half the operating distance

<sup>\*</sup> standard fibre-optics
